Outsourcing Agreement of Technical Support and Services with Vibrattech

IMV CORPORATION hereby announces that we have signed the agreement for the outsourcing of technical support and services with Vibrattech Limited, a service and maintenance company located at Royston, UK. We will start assembling the vibration test systems locally at UK in the near future. The product delivery from Japan to Europe used to take approximately 1 month. We believe that the localized assembly would be able to reduce a large amount of delivery time and contribute to further expansion in Europe.
